LESSON 5.1 CONTINUED - YOUR EXPERIENCES WITH AIR!

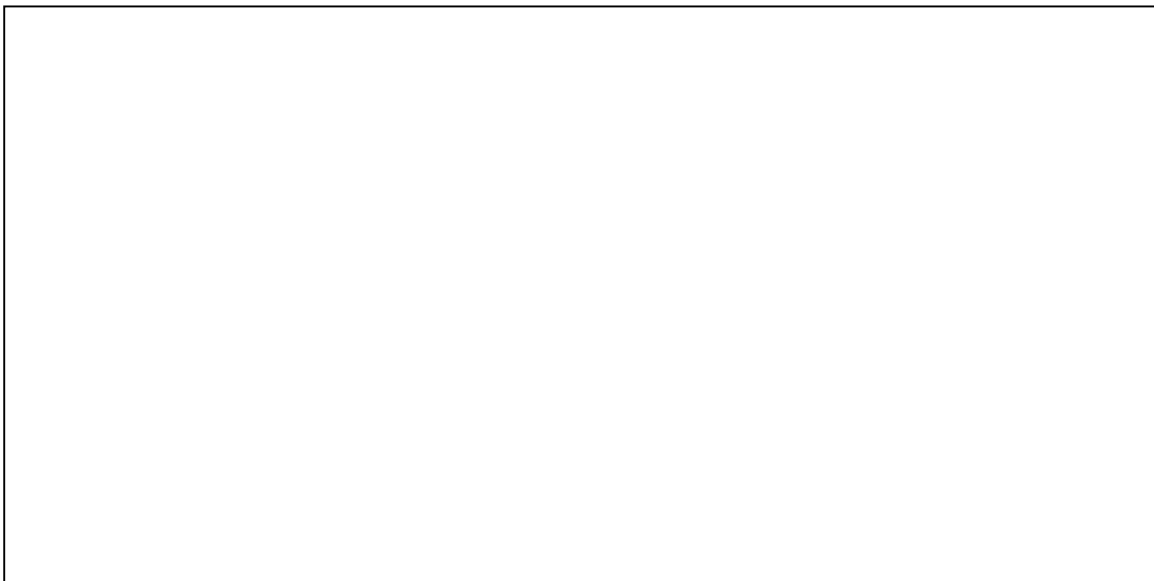

Now that we have spent class time exploring different experiences with air and explaining the situations using molecules, it's time for you to come up with your own example.

TITLE & CAPTION

Choose a situation that involves a common material or object (like a basketball or wind chimes) that is filled with air or interacts with the air. Below, write a title for your picture and a short caption.

DRAW

Draw a picture of your situation. You may color it for an extra credit point!

EXPLAIN (USE MOLECULES)

In 1 or more sentences, explain what is happening in your picture. Be sure to use molecules in your explanation!
